

CORSICAN TREASURES

IMMORTELE
[*helichrysum italicum*]
AN ANTI-AGEING ACTION, NATURALLY EFFICIENT

The Immortelle, symbol of the Corsican scrub, originally named in Latin *Helichrysum italicum*, is widely known for its exceptional regenerating and anti-free radical properties. The essential oil of Immortelle used in the line of products of KYRNELLA Nature Cosmetics is exclusively obtained of fresh flowering tops. The active ingredients (acetate of neryl, italidiones and β -dicetones), are highly concentrated and allow a restructuring action by increasing the collagen rate favourably. And the Corsican Immortelle also reduces blotchiness and brown discoloration of aging.

CORSICAN HONEY
[*mele di corsica AOP & AOC*]
AN UNEQUALLED MOISTURIZING PROPERTY

The Corsican Honey, one of the only French Honeys with a registered designation of origin (A.O.C. : Appellation d'Origine Contrôlée), has prodigious moisturizing and healing qualities. Its unique components act efficiently on the water molecules of the skin, by restoring its elasticity and its natural beauty. Thanks to a preserved environment and an unequalled botanical richness, the Honey from Corsica is full of vitamins A, B2, B3, B5, B8, C and D: there lies the secret of its healing and moisturizing virtues.

CHESTNUT
[*castanea sativa*]
A HIGH POTENTIAL IN RESTRUCTURING

The chestnut tree is known as the tree of life. In Corsica, its fruit, particularly small-sized, is highly concentrated in minerals, vitamins, trace elements, flavonoids, polyphenols, uronic acid, potassium and aescine. Those active components, alone or acting in synergy, have an optimal decongestant and invigorating effect on the skin. The Chestnut of Corsica has remarkable benefits, thanks to its purifying and restructuring virtues.
